Many people think of the Big Bang as a cosmic explosion at a point in time in empty black space. But this is not a proper understanding of the Big Bang. Scientists believe that the Big Bang was actually the beginning of space and of time itself (space-time). The idea that

time is part of the creation is very difficult to grasp.

3/5/2021 · What's This Big Bang All About? In 1927, an astronomer named Georges Lemaître had a big idea. He said that a very long time ago, the universe started as just a single point. He said the universe stretched and expanded to get as big as it is now, and that it could keep on stretching.. What an Idea!
