Black Death (one title is repeated). For most of these, however, the Black Death appears only as the reference point for beginning or ending an investigation or as an aside for an examination of the persecutions of 1320-1. Hence, less than a handful of the titles actually examine the massacres of 1348-9. A recent symposium on medieval

The flea had a gut full of the bacillus *Yersinia pestis* .”. With that rat, flea, and bacillus, came the most feared plague on record. In just three years, 1348 to 1350, the Black Death killed ...

The Black Death was so extreme that it's surprising even to scientists who are familiar with the general details. The epidemic killed 30 to 50 percent of the entire population of Europe. Between 75 and 200 million people died in a few years' time, starting in 1348 when the plague reached London.
