The “Steinbeck Firsts” images and the related text are far more revealing of the differences between the first editions and various other editions than are the traditional

Moon-Earth-Sun: The oldest three-body problem Martin C. Gutzwiller IBM Research Center, Yorktown Heights, New York 10598 The daily motion of the Moon through the sky has many unusual features that a careful observer can discover without the help of instruments. The three different frequencies for ...

These depressions on the moon's surface are caused by the impact of meteorites and other debris. 8. When the solar system was forming, a body the size of Mars impacted Earth. The resulting debris was ejected into space, began orbiting around Earth. MoonOrigin: 10. When the Moon is at a right angle to Sun and Earth it is in these phases. 11.

Suppose the penguin above was running on land instead of swimming. If the penguin waddles at a velocity of 29,880 m/s, how far will it travel in 10.0 seconds? 298,800 m 3. Like the penguin, the walrus is a fine swimmer, though it does not have the same endurance. For short periods of time, a walrus can swim with an average velocity of 9.7 m/s.

It treats Sun as stationary globe around which earth and other planets orbit, It calculates the earth's diameter to be 8,000 miles (modern: 7,928 miles), the diameter of the moon as 2,400 miles (actual ~2,160) and the distance between the moon and the earth to be 258,000 miles (now known to vary:

221,500–252,700 miles (356,500–406,700 kilometres).

Ban Ki-moon Secretary-General of the United Nations. v Foreword Executive Director United Nations Office on Drugs and Crime The use of the Internet for terrorist purposes is a rapidly growing phenomenon, requiring a proactive and coordinated response from Member States.

The Sūrya Siddhānta (lit. 'Sun treatise') is a Sanskrit treatise in Indian astronomy in fourteen chapters. The Surya Siddhanta describes rules to calculate the motions of various planets and the moon relative to various constellations, and calculates the orbits of various astronomical bodies. The text is known from a 15th-century CE palm-leaf manuscript, and several newer manuscripts.
