Physical therapy continued to evolve and develop. This development was primarily due to injuries sustained by soldiers during wars and advances in medicine that kept the soldiers from dying from these injuries. This dynamic evolution made the physical therapists develop educational and training programs that lead to physi-

Physical therapy practice in the United States evolved around two major historical events: the

poliomyelitis epidemics of the 1800s through the 1950s and the effects of the ravages of several wars. Marguerite Sanderson and Mary McMillan were the first two individuals involved in the training of “reconstruction aides” responsible for caring for those individuals wounded in World War I.
