12/4/2019 · Space is the final frontier for understanding how extreme environments affect human physiology. Following twin astronauts, one of which spent a year-long mission on the International Space Station, Garrett-Bakelman et al. examined molecular and physiological traits that may be affected by time in space (see the Perspective by Löbrich and Jeggo).

Written and Illustrated by: Markus Motum. Maybe you remember when a little robotic spacecraft landed on a far-off planet. On
