The mining industry impacts positively and negatively across the SDGs, and the nature and quantum of the impact depends on mining practices. Mining can foster economic development by providing opportunities for decent employment, manufacturing, increased fiscal revenues, and ...

The mining industry is cyclical, thanks to the lag between investment decisions and new supply. Demand tends to grow in a relatively stable fashion on the back of global economic growth. By contrast, supply is added in bulk when a new development is completed. Figure 1: GDP growth (%) Source: IMF, PwC Analysis-4-2 0 2 4 6 8 10

From 1980-1995, mining had the highest fatal occupational injury rate recorded in the National Traumatic Occupational Fatalities Surveillance System (NTOF), with a rate of 30.3 fatalities per 100,000 workers. This is 50% higher than the next highest industry division—agriculture, forestry, and fishing—with a rate of 20.1 per 100,000

mining industry. Every year, KPMG asks mining executives about the state of their industry, key trends, and their expectations for their organizations. This year, we expanded the survey to capture key global market trends, backed by responses from over 130 executives and industry highlights from Canada, Australia, Brazil and South Africa.
