Length of Time: About 45 Minutes. This lesson is designed to teach students to draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Plus, solve simple put-together, take-apart, and compare problems.

Two step math equations are algebraic problems that require you to make two moves to find the value of the unknown variable. For example, using the equation  $3x + 5 = 11$  we will need to perform two steps to find the value of  $x$ . The first step would be to get the constant values of the equation by themselves. In this case 5 and 11 are our constants.
