Hitch Bar Hitch End is approximately EQUAL TO the difference figured in step 7. Step 9: Insert the 5/8 x 4" Hex Pivot Bolt into the LOWER pivot hole in the side plates and through the Hitch Bar Hitch End holes that line up when you have the proper offset from step 8. Place the 5/8 Split Lock Washer on the pivot bolt and snug fit the 5/8 Hex nut.

The Smart Hitch system from Hopkins is a basic trailer hitch camera system that is similar to others in that a camera attached to your hitch gives you a live view in the driver's seat to help guide your hitch in. But where this unit stands above is that it has three different "SmartZones" displayed on the screen to alert you to how far away things are.

Do not attempt to hitch by using trailer jacks to lower trailer and king pin. This could result in king pin coming to rest on top of skid plate instead of within hitch opening where jaws are located. King pin could slide off hitch and trailer could drop, resulting in death or serious injury (See Fig. 13). Fig. 11 Fig. 13 WRONG Hitch Jaws

Weight Carrying Trailer Hitches: Weight

Read Trailer Hitch Guide Plate.pdf

Carrying trailer hitches are typically used for trailers up to 3,500 lbs GTW and 300 lbs TW. Some vehicles such as pickups and vans have stronger springs to support higher loads. Weight Carrying trailer hitches support the entire tongue weight on the rear of the car.
