The engine was designed and developed by Rover at Longbridge to replace the Honda 2.7l V6 engine which was about to become non-compliant with tightening emissions legislation. The original unit was designed for low volume production but was later redesigned to fit into the smaller Rover 75's bonnet, although performance remained similar.

4/4/2019 · The engine range consists of a V6 engine, a couple of V8 engines and a turbo-diesel engine. As far as the Range Rover gasoline engines are concerned, supercharging technology provides the base for these engines. The standard 3.0-liter V6 engine delivers ...
