2/2/2017 · Today, healthcare is increasingly recognizing the relationship between reducing variation and improving outcomes. Interventions to reduce variation for a targeted process can improve care by establishing consistency based on best practices. The industry's evolving data capabilities, such as Late-Binding™ technology, are expanding health ...

25/4/1998 · Many people have inequitable access to adequate health care, and many governments are unable to provide such care universally. In addition there is a large variation in availability and use of health care by geographical area and point of provision. 8 Availability tends to be inversely related to the need of the population served. 9

The rate of growth in health care spending is the single most important factor undermining the nation's long-term fiscal condition. Why Should Controlling Health Care Costs be Linked to Promoting Good Health Outcomes? Increasing pressure to control health care costs necessitates that limited healthcare resources be used equitably and judiciously.
