Mechanical ventilation can be provided via non-invasive or invasive means and involves the delivery of positive pressure breaths. Gas flow is delivered via a constant or decelerating pattern and the volume is dependent on inspiratory time, gas flow and pressure applied at the airway.

3.0 VENTILATOR SETTINGS Respiratory rate and tidal volume: The basic respiratory parameters of any ventilator are tidal volume (V_T) and respiratory rate (RR). Respiratory rate is set directly using the RESP RATE knob, and reading it out on the top line of the LCD display. Tidal volume in a flow-time ventilator has two components which are adjusted
