The graphics display resolution is the width and height dimension of an electronic visual display device, such as a computer monitor, in pixels. Certain combinations of width and height are standardized (e.g. by VESA) and typically given a name and an initialism that is descriptive of its dimensions. A higher display resolution in a display of the same size means that displayed photo or video ...

20/10/2012 · Our church has a Viewsonic Pro8500 DLP. I wasn't there but I was told that the lamp went out and was changed (not by me) and when it was powered up all that happened was the indicator lamp glowed steady blue for about 15 secs. and then went to a flashing blue. After searching your posts it seems that the lamp timer needs to be reset.
