According to APIC text of Infections Control and Epidemiology: “the field of microbiology includes the study of bacteria, fungi (molds and yeasts), protozoa, viruses and algae.” As Infection Preventionists, you are going to encounter these organisms during your career.

Since viruses also do not have bacterial parts, they remain unaffected by antibiotics. 5. bacteria and fungi 6. Answers include: wash hands frequently, don't eat foods that may have spoiled, don't touch your nose or mouth 7. Overuse: Answer should include natural selection in bacteria ...

v. 3 structures of bacteria: cocci (spherical), bacillus (rod-like), and spiral 1. Bacteria are really small, a lot smaller than our human Eukaryotic cells. We have to use an electron microscope and a light microscope to see it. 2. Arrangements: the arrangement of bacteria tells us how many bacteria live together in a colony and how the colony

A typical virus is composed of a core of DNA or RNA surrounded by a protein coat called a capsid. Viruses that infect bacteria are called bacteriophages. They enter living cells and, once inside, use the machinery of the infected cell to produce more viruses. Viral Infections Viruses have two methods of infection once inside a host cell.
