31/1/2019 · The Visual Studio 2019 screen will pop up, which contains four boxes on the right side. Clone or checkout code. Open a project or solution. Open a local folder. Create a new project. From the above options, we need to click on the "Clone and checkout code" box, which opens a new window and will ask for the repository location and local path.

11/10/2012 · 3- drag & drop or copy & paste [forms, class files, etc.] from one solution to the other (you can use the solution explorer as a source and destination) As I said, not exactly what you were asking but the results are similar, and I think the process is simpler (because all the project properties already refer to the new project).

19/5/2009 · Visual Studio does not allow you to copy from the solution explorer, switch to the other Visual Studio instance, and then paste the files. Instead, you get the following error: The source files for this operation cannot be found in this solution. While it's a bit of a pain-in-the-arse, there is a fairly simple workaround to this. Start in the ...
