The problem is the first engine bank and it should be looked for in the electrical circuit itself. P0011 Malfunction or malfunction of the intake camshaft timing control device. If the device itself is working properly, then make sure that the engine fluid level is adequate in the engine. Also, the problem may consist in tensioning the timing ...

The diesel engine, named after Rudolf Diesel, is an internal combustion engine in which ignition of the fuel is caused by the elevated temperature of the air in the cylinder due to the mechanical compression; thus, the diesel engine is a so-called compression-ignition engine (CI engine). This contrasts with engines using spark plug-ignition of the air-fuel mixture, such as a petrol engine ...
