18/7/2019 · One of those exceptions is the 1.2 litre engine in the Polo. The 1.2 is underpowered lemon and is known for a variety of common faults. In early production the Inlet cam gear was plastic and known for failing causing catastrophic engine failure. VW issued a recall for these and a replacement gear was used that gave less trouble.

For Volkswagen, new and further development of engines with direct petrol injection is an important contribution towards environmental protection. The frugal, environmentally-friendly and powerful FSI engines are offered in four derivatives for the following vehicles: - 1.4 ltr./63 kW FSI engine in the Polo - 1.4 ltr./77 kW FSI engine in the Lupo
