internationalization, localization and translation of its solutions have been key features. 4.

implement, service, and support the SAP solution that best fits their unique needs. They help organizations to achieve business goals quickly with better results. Broadly, SAP partners help in: Solving small and midsize business needs Extending SAP solution with custom apps Managing country and language rollouts

It's common that customers need to quickly and easily generate a PDF from SAP for a document. Typically, we do this by setting up an output type that has a PDF output defined. But what if this is a last minute request from a user and no output is defined? An undocumented feature in SAP allows you to generate a PDF directly from an SAP print preview.

The two key components of any SAP solution are the SAP NetWeaver and SAP Web Application Server. n SAP NetWeaver is the technical foundation for many SAP applications. It is a solution stack of SAP's technology products. n The SAP Web Application Server is the runtime environment for SAP applications on which all of the Business Suite solutions ...
