Wild Animals In Captivity. THE late Mr. Bartlett had such an extensive and almost unrivalled practical acquaintanceship with animals in menageries, that the publication of the notes kept by him during a long life might naturally be expected to be an event of more than usual interest. But, although there is much to attract general attention, and ...

Captivity (animal) - Wikipedia Wild animals belong in the wild — not in the confinement of circuses, zoos, aquaria, backyards, or homes. In captivity, wild animals are not able to perform their natural behaviors and many lash out in frustration from psychological and physical deprivation. This situation is dangerous for animals and humans alike.

Wild animals are kept for a variety of reasons and in a range of environments, including zoos, circuses, other performing environments and as pets in homes (known as 'exotic pets'). Giving wild animals what they need in captivity can prove challenging! The best captive environment mimics elements of an animal's natural

caring about other animals. Why wild animal suffering is very important In order to get a better sense of the importance of wild animal suffering, we need to be aware that many animals have lives filled with suffering, as in the examples above. Such cases are much more numerous than we might initially believe.

Breeding animals in captivity would protect the few endangered animals that are still alive from being hurt or from dying if they were in the wild. It would also keep the newborn animals safe and help them survive because doctors would be able to observe the animals in captivity and the animals wouldn't be hurt by other animals
