However, the mechanism on the Super X3 mill is entirely different than that on the mini-mill. On the mini-mill, the handwheel moves the entire head assembly up and down the column using a rack and pinion arrangement. By contrast, on the Super X3 mill, the head remains stationary, with a separate quill assembly being the moving component.

The mill is shipped in a wood crate and is bolted to a reinforced plywood and particle board base. From the web sites I have read, X3 owners have all received their mills without shipping damage, as did I. You'll need some tin snips to cut the metal bands - or just twist them back and forth with pliers until metal fatigue breaks them apart.
